

Client: Chase Bank

Programs: New Market Expansion
ATM Roll-Out
Existing Branch Renovations

Locations: + 1,000 Sites – Nationwide

As part of the New Market Expansion Program Designers Edge plays a critical role in collecting Existing Conditions Data (Point Cloud Scans, Highly Detailed CAD Drawings, 360 Degree Images, and HD Photos) for Properties that Chase Bank is seeking to purchase or lease.

The nature of these projects is secretive, and our personnel go through great lengths to not disclose the markets in which Chase is acquiring facilities, and while we are conducting the Surveys the people on site are not aware of Chases interest.

We are given no notice about where Projects will be in the US and typically are on site within 2 days of the request and 3 days after that turning around the complete survey deliverable.
